## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-7 are allowed.

The prior art neither teaches nor fairly suggests an electronic camera comprising: an image-capturing element that captures an image of a subject and outputs image data of the captured subject image; a compression processing unit that implements a fixed-length compression on the image data so as to compress the image data within a specific range of a target code volume; a recording unit that records compressed data resulting from the compression implemented at said compression processing unit into a storage medium; a remaining-capacity detection unit that detects a remaining capacity of the storage medium; and **an allowable upper limit setting unit that sets an extent to which said target code volume may be exceeded within a capacity range corresponding to said remaining capacity**, wherein: said compression processing unit performs fixed-length compression on the image data while allowing said target code volume to be exceeded within said extent, as claimed in Claim 4.

Claims 1 and 6 are substantially similar to Claim 4.
